

Twelfth Year, No. 21

GLEICHEN, ALBERTA, THURSDAY, AUGUST 8, 1918

\$1.50 Per Year

A Few Specimens From the South

In The Call will now be seen some sample of grain and hay that Fred Williams brought in a week ago to show what his and his neighbors are able to grow south of town this exceptionally dry year without irrigation.

Fred has 140 acres of Marquis wheat that will run 40 bushels to the acre, and his neighbors 400 or 500 a roe equally as good and stand three feet high.

Sixty acres of Club head wheat, averages 30 inches in height and should yield not less than 35 bushels to the acre.

Forty acres of Barley grown on stubble measure three feet high and should yield 25 bushels to the acre.

Oats measuring three feet four inches is expected to yield eighty bushels to the acre and there is one hundred acres in the field.

Eighty acres of fall rye is three feet high and the average is placed at 35 to the acre.

Twenty-five acres of spring rye grass is expected to yield ten and a half to the acre.

And 25 acres of home grass will yield about the same as the rye.

All the crops at the head of the West Arrowwood creek are not equal to these specimens, but these go to show what can be done on dry land in this country with good farming in a very dry year.

Prairie fires were responsible for a great amount of damage last week south of Bow river, thousands of acres of pasture lands being swept clean. Moffatt Bros. and Hardwick Bros. lost out of the river were all burnt and the former also lost heavily at their west ranch, and the Indian reserve and some farmers were also burnt. Fuel being very scarce this year the loss is felt very keenly and can hardly be estimated by the thousands of dollars it means to these ranchmen. Farmers for miles around turned out to fight the fire, and horses and gasoline outfits were brought into action to play firetrucks with good effect. The origin of the west fire is unknown and it is said started over a mile from this spot. To great concern has been taken to prevent fires during this exceptionally dry season.

The Gleichen Baseball Club, accompanied by a large number of fans, returned to Vale last Friday to try conclusions with the fast aggregation of the south. The boys played Class A ball, but, due to a rank decision by the umpire, lost the two scores for Vulcan, lost the game, 2 to 3.

A general meeting of all farmers in the district is called for Saturday evening, August 17th, at 8 o'clock. The purpose of this meeting is to find out how much oats and hay will be needed and to devise means to obtain same from the north country. Every farmer interested should attend. The meeting will be held in the new hall.

After considerable delay the Walter Bros. Repairmen have received the new valving machinery. It is now being installed. They are now prepared to make any kind of repair on any steel tire or tube and to do up an opportunity to do a little extra work can be done with this new machine. A man with years of experience will be in charge of the machine and first-class workmanship is guaranteed.

Campaign to Send Gleichen Soldiers Xmas, Cheer East Arrowwood

Tuesday afternoon a few of the Gleichen town and country folk held a meeting and decided to do their best to send a Christmas box to every boy that has enlisted from the Gleichen district. The meeting was called hurriedly as it was realized the time is short in which to prepare the boxes and get them to the trenches in time. For this reason, it is requested that every lady in the district help in some way, remembering that this movement is in no way connected with any society, but depends entirely on volunteer efforts.

First it is important that everyone send to Mrs. W. H. James, the secretary, the names and address of all you know, paying special attention to enlisted men who have no relatives in this district, for none is to be missed or overlooked.

The next important thing is to collect \$600. It is estimated that Gleichen has over 300 boys overseas and to do justice that amount will be at least required. So send along a donation to the secretary yourself along with any you can induce your friends to give. No real person can find it in their heart to refuse to listen to this appeal to give our children a little Christmas cheer across the waters.

The ladies have divided the town into districts and will call personally at every residence, and then proceed to visit as many as possible in the country.

The important things for all to remember is that the time is short, every soldier should receive a box and to send addresses and contributions to Mrs. James.

Enthusiastic Agricultural Meeting

Last Friday evening the Gleichen Agricultural Association meeting was not largely attended but some important business was transacted with considerable enthusiasm.

The committee appointed to sell shares and gather donations reported that although they had not nearly completed their tasks they had in cash and promises nearly \$600 and said they were now sure they would be able to get sufficient to place the Association on a solid financial basis.

The committee composed of Messrs. Bartsh, Dufre and Matthews, who have in hand the purchase of the land, were on motion instructed to have an agreement prepared and signed with the Canadian Pacific Railway on a twenty-year payment plan and to make the first payment. Messrs. Young, Henderson and Dufre were selected a committee to examine the buildings, fences, etc., and furnish the Association with a report of the necessary repairs and an estimate of the cost of them. Considerable discussion was included in concerning the planting of trees and the laying out of park grounds. It was thought a bee could be arranged and the cultivation necessary be accomplished without cost.

There being some discussion as to the old shareholders being allowed to claim the privilege of the new it was pointed out legally the old share could not be done away with and several expressed the opinion that no shareholder would ever ask for interest now in arrears. Eventually a motion was carried instructing the secretary to write all the old shareholders he could obtain the address of and ask them, in view of re-organizing, to send their stock certificates to him, when they would be cancelled and new stock certificates issued. Thus old and new stockholders would be placed on the same basis.

After indulging in a review of bright prospects of the Association and all present promising to do their best to interest the meeting then adjourned to 8 o'clock Friday evening, August 30th.

Sunday School Convention

Mrs. D. McLeod and R. Elder returned Monday from attending a Sunday school convention held at Bassano on Sunday and report a very interesting and enjoyable session. The convention opened at 10 a.m. with a splendid attendance of the younger scholars. The pastor, Mr. Patten, was in the chair and after a most enthusiastic song service, led by Mrs. A. McGregor, organist, the classes took their places and pursued the study of their lesson. Mr. Patten introduced M. E. Rostad of Calgary, president of the Alberta S. S. Federation, who spoke and spoke for the Sunday school for the children on Sunday school work.

On Monday Mr. Patten was elected chairman and Mrs. A. Cross secretary for the convention in session. The gathering then adjourned until 2 p.m. Mr. T. W. Waite of Lethbridge then took charge of the praise and devotional exercises and spoke for a few minutes from Luke 24:29, after which followed the roll call of the school, to which delegates from the Gleichen, Lethbridge, Glen, Bassano and Gleichen responded.

Miss Viola Eisenbach has left for her home in Chicago where she has charge of a large mission work. Her many friends wish her a pleasant journey and success in her work.

John Rhodes and Miss Francis Lehman from Brant were East Arrowwood visitors Sunday.

The faithful and inspiring lectures by V. Finlay, at Breckin's Church last week, were enjoyed by everyone.

John Hollenback from La. Vern, California, who has been spending his vacation with his father here, has been called home by Uncle Sam.

Mrs. Oustad, from Red Cliffe, is visiting at the home of her brother, Mrs. Oustad, who is a teacher at East Arrowwood school.

Mrs. C. M. Miller has returned from Calgary where she has been visiting for the past week.

Jay Ebie, from Queenstown, with his father and mother, Miss Hattie and Mrs. Ebie, with Miss Lily Ebie, were visitors here Sunday.

Mrs. G. Jones and Mrs. Glen Hosen have just returned from Seattle, where they have been visiting their sons in the U. S. Navy. We are glad to learn that the boys are getting along very nicely.

L. Lervall and his mother, from Majorville, with Miss and Mrs. Heather of Calgary, were very welcome visitors here Sunday.

Our Sunday school attendance last Sunday morning was 145 with a collection of over \$10. Mr. Shatto spoke to us in the morning and gave an account of his journey to North Dakota as a delegate from this church. There was a large attendance in the Christian Workers meeting in the evening when Clayton Shatto proved a capable and interesting leader. Bro. Culp afterwards gave us a splendid sermon.

Papers were read by Mrs. Holm of Lethbridge on "Teachers Training Course", and by Mrs. A. Cross of Bassano on "The Relation in Relation to Sunday Schools", and the discussions following were ably handled by Mr. W. E. Decker of Lethbridge and Mrs. Mutter of Bassano. The program was interspersed by solos from Mrs. Davis, Mrs. Holm and Mrs. Elliott, which were much enjoyed, following which Mr. Shatto gave a splendid address on the "Standard Sunday School". A supper was served in the church to some seventy visitors by the Bassano ladies.

A pleasing feature of the evening was a trip given by three of the Gleichen ladies, also Mr. Shatto's address to the parents on "Co-operation with the Sunday School Teachers".

Mr. Patten is to be commended on the success of his undertaking as he was the originator of the convention. The attendance was all that could be desired as the church was filled to its utmost, and all parted feeling it was good to have been there and returned to their various homes with renewed enthusiasm.

Rev. H. Young of Morinville will conduct Presbyterian services in the Methodist church, next Sunday at 11 a.m. and 7:30 p.m.

MATTHEWS & KIDNEY, "THE CASH STORES"

GLEICHEN and CLUNY	
Remnants Another bunch of remnants of print gingham, dress goods, cotton sheeting, toweling etc., length ranging from 2 1/2 to 6 yds.	Auto Caps Just arrived a nice assortment of auto hats and caps. Some tweed effects. \$1.50 to \$3.25
Ladies Voile Blouses Just a special range at a popular price. Dandy new styles, all sizes. Special \$1.65 each	Window Shades We are still selling these at the old price but just 4 dozen left. The next we get will be \$1 each. While these last we will sell them at 75c each
Silk Lisle Hose This is a special line we are offering for immediate sale. We could not sell them under 75c were they not bought months ago. All sizes 8 1/2 to 10 in white or black 60c pair	Ladies Princess Slips These are made of choice quality nainsook, absolutely free from dressing and a very fine thread. These last we will sell Saturday for \$1.50

GROCERIES

Specials For Friday and Saturday

Salmon 25c tin
Pine apple 25c tin

Complete Assortment Repairs in Stock if Needed

The Nilson Kerosene Tractor

Junior 16-27 and Senior 24-36
\$1940.00 and \$3285.00

F.O.B. Gleichen
EIGHTEEN MILLION
horses on 6,000,000 American farms are enough grain in the past year to feed 10 million people, or about one-third the population of the United States.

These figures, from the Department of Agriculture at Washington, D.C., assume vast importance in the light of the Government's propaganda to increase food production during the war.

THE NILSON
is more economical for the amount of work it will do than horses. Big traction, light weight, simplicity and fuel economy make the NILSON the right tractor for every farm.

Examine the cost carefully and you will understand from the drawings how we get Traction by Pull, and not by weight. Many tractors now on the market have good motors, but unless the power is transmitted to the wheels traction with out too much loss, the cost of operation becomes excessive.

THE NILSON
Be sure of your service with your tractor. In the rare cases when you need special parts or the help of service men, we are ready to help you. With the NILSON you not only get a good tractor but also our co-operation in making that tractor a paying proposition to you.

To the Rescue of Russia

To Free Herself From the Double
Incubus of German Domination
and Bolsheviki Misrule

If Finland expects that vassalage under the kaiser will be more endurable than vassalage under the czar, we envy her optimism. The sympathy of the liberty-loving world will go out to her in her hard plight. What we said last week of Russia we now say of Finland: The best way for the allies to help is to crush German autocracy. Meanwhile, if we can aid Russia to free herself from the double incubus of German domination and Bolsheviki misrule, we shall aid also in the restoration of peace and the acquiring of self-government by Finland.

The crushing tragedy of Finland is one more argument for the extension by the allies, including the United States, of definite, concrete aid to Russia. Congress is now debating what can be done to accomplish this. Reports from Washington indicate that our government is more and more turning to such a solution as that advocated by many of those who know Russia best. In short, this is: An advance from the eastern coast of Siberia by a combined army in which Japan should predominate in numbers, but which should be representative also of the other allied nations. Such a combined army advancing to the Trans-Baikal could there serve as a gathering point and castle of strength for moderate Russians who desire self-government and detest Germany. This may be difficult, but the possibilities are almost without limitation. Sooner or later, the rescue of Russia may prove a deadly blow to German world cupidity.

Finland serves as an example of what Russia will become if we and our allies do not come practically to her rescue from the two evils of Prussianism and Bolshevism. What such rescue involves is indicated by Mr. Caspar Whitney, as reported on another page. What that rescue will mean to the war is tersely stated by our ex-president Taft, who has said: "We must go into Russia and make an eastern front."—From the New York Outlook.

The Kaiser's Gratitude

The kaiser is "filled with the most profound gratitude to God's mercy." No man needs it more. It is characteristic of something much resembling mental disquietude that it is "amid my armies" that he feels this profound gratitude to God's mercy. Thank God, his armies are left, so far, and his fleet is spared as long as he keeps it from coming out.—New York Times.

Combine The Grains

That's what is done
in making Grape-Nuts
food — barley and
other grains are
used with wheat.
This adds to food
value and flavor,
and the sum total
requires less wheat.

Providing for the Growing-up Family

Several Large Tracts of Land Sold
to Communities

One of the many reasons that are inducing farmers from old-settled districts to take up land in Western Canada is the desire to provide for their families now growing up. Where they have been farming, land is too costly to be secured for the young folks; but, being able to sell their farms at prices ranging from \$150 an acre upwards, these farmers are in a position to secure more extensive holdings in the fertile prairie provinces of Western Canada, thus making adequate provision for the needs of their families without any additional investment of capital. Just recently several large tracts of land have been sold to communities that wish to form settlements of their own. In central Saskatchewan the Christian Community of Universal Brotherhood have purchased 10,163 acres of fertile land at \$25 an acre. Many members who left this province three years ago are now returning, having satisfied themselves that they cannot do better than stay on the prairie lands.

Another tract in Saskatchewan that has just been purchased for settlement comprises 15,000 acres. The price at which this land has been secured has not been made known. This land is especially suited for dairy and diversified farming, and it is understood that farmers of Minnesota, Wisconsin and Illinois are interested in it.

Near Lethbridge, Alberta, a 1700-acre farm has just been sold to a small party of Mennonite farmers for a hundred thousand dollars.

THE DANGER OF THIN BLOOD

If Not Corrected in Its Early Stages
Consumption May Follow

In no disease is delay or neglect more dangerous than in anemia, a poverty of the blood. It is very common in young girls and in persons who are overworked or confined within so stealthily an insidious manner that it is often well developed before its presence is recognized.

But taken in time there is a specific, a tonic medicine which increases the number of red blood corpuscles thus enabling the blood to carry the life-giving oxygen to all the tissues of the body. Dr. Williams' Pink Pills have had unbounded success in the treatment of this stubborn disease because of this wonderful property. The correction of anemic conditions by Dr. Williams' Pink Pills is as certain as anything in medicine. Says Miss Jessie McLean, Trenton, N. J.: "I was as weak as it was possible for any one to be, and yet I was able to go about. My blood seemed to have turned almost to water. I was pale, the least exertion would leave me breathless, and when I went up stairs I would have to stop and rest on the way. I often had severe headaches, and at times my heart would palpitate alarmingly. A good friend urged me to try Dr. Williams' Pink Pills and I have reason to be grateful that I took the advice. Soon after beginning the use of the Pills I began to get stronger, and by the time I had taken seven boxes I felt that I was again enjoying good health. I think Dr. Williams' Pink Pills are a blessing to weak girls, and I shall always warmly recommend them."

These pills are sold by all medicine dealers or will be sent by mail at 50c a box or six boxes for \$2.50, by The Dr. Williams' Medicine Co., Brockville, Ont.

Scored Five as Last Shot

Major Bishop Brought Down Five
Planes Before Leaving Front

The Canadian Associated Press learns that Major Bishop, Canada's premier aviator and pilot, who has the largest number of air victories to his credit of any aviator in the war, has returned to England to take up an appointment at the air ministry in the department of the chief of the air staff. Bishop's recall was ordered by Lord Weir, the air minister, at the special request of Sir Edward Kemp, the overseas minister, as it was considered that Bishop should be placed in a position where his unique war experience could be utilized to the best advantage, especially in connection with any developments that may take place regarding the organization of the Canadian Air Force.

Three weeks ago Bishop took to France a hand-picked fighting squadron of whom a large percentage were Canadians. The squadron was equipped with the latest and best British fighting airplanes and in the short time they have been at the front they have accounted for an extraordinary number of enemy machines. Bishop's record of boche airplanes brought down in aerial combat has now reached a total of seventy-two. If reckoned on the same basis as those of the late Baron von Richthofen, champion German aviator, who counted a double-seated machine as two victories, Bishop's total would be well over the century mark.

On the morning of the day he received orders to return to England, quite unexpectedly by him, he went out for one last flying dash at the Huns, and before his return brought down five enemy machines. Upon his return he said good-bye to his comrades, jumped into a motor car and caught the boat for England.

Boys' Prejudice

"Why did you name your boy 'Reginald Clarence'?"
"Because I wanted him to be a fighter. I figured that in our neighborhood a boy named 'Reginald Clarence' has got to fight."—Chicago Tribune.

Kaiser is Now in Melancholy Mood

Said to Be Very Tired Physically
and Mentally

It is impossible not to be struck by the melancholy tone of emperor William's speech on the occasion of the thirtieth anniversary of his accession, all the more so as the fact that he was spending the day with the army in the enemy's land ought to have inspired the kaiser to make one of his characteristic addresses containing a mixture of boasts and threats and winding up with a furious, sword-rattling, cables Rene Feibelmen from Amsterdam.

The kaiser is said to be aging rapidly, and to be very tired physically and mentally. His latest photographs clearly show that in looks he is twenty years older than in 1914. In spite of the clamor about victories he is greatly disappointed at the length of the war, and is said to have told his entourage a number of times that he had a sort of feeling that he would not see the end of the struggle. This and the news that the German and Austrian offensives had both gone wrong may have inspired him when answering Field Marshal von Hindenburg's congratulations in the name of the German army.

It is strange for a man with such an inborn and immeasurable pride as the kaiser to openly admit on the jubilee day of his reign that "his work had not always been successful and that especially in matters relating to politics he had suffered many disappointments."

The climax of the speech, however, was the kaiser's frank and sad admission that England's intervention in the war had changed the whole character of the struggle, and turned it from a strategic affair into a world combat. "I knew exactly what was going to happen," he said. "You Germans did not know. Therefore I did not let myself be misled by the first wave of war enthusiasm."

Explaining the war as he understands it, the kaiser strangely enough held that it would be unwise to beat the allied forces. He only wanted to ensure the success of the Germanic way of thinking, that is "the Germanic conception of honor, right, freedom and morality," in opposition to the allies' "worship of money alone."

"The only thing that matters," exclaimed the kaiser, "is the triumph of the German 'weltanschauung' (world conception). The imperial address gave little pleasure in Germany, as its gravity and sadness were too apparent to be overlooked. It is the first time since the world-war began that the kaiser has delivered a speech giving such an impression."

Still Here

In Chicago they tell a story of a sick man who had just emerged from a long delirium.
"Where am I?" he asked, very feebly as he felt the loving hands making him comfortable. "Where am I?"
"In heaven?"
"No, dearie," said his wife gently. "I am still with you."—Vancouver Province.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Briquetted Fuel

Governments Recommended to Establish Lignite Plant

Establishment of a lignite briquetting plant to be financed and operated by the Dominion, Manitoba and Saskatchewan governments is recommended by the lignite committee of the advisory council for scientific and industrial research. The committee's report favors establishment of the plant in South Saskatchewan "at a locality where the lignites are of poor grade, with the idea that if it were successful at this point, it would undoubtedly be successful elsewhere in Saskatchewan and Alberta."

The committee's estimate gives \$400,000 as the capital cost of the completed plant. Production costs at the plant for carbonized and briquetted fuel covering operating costs and fixed charges, are estimated at not more than seven dollars per ton. In this estimate no financial allowance has been made for the recovery of by-products which are stated to be large and valuable.

Wireless in Forest

Two wireless receiving and sending stations have been discovered in the fir forests bounding Puget Sound near Tacoma by government agents after a search of two days. Trees stripped of their limbs were used as aerials and the locations were well hidden by the surrounding forest. The apparatus had been removed from one, but the complete outfit had been left behind at the other station in the hurried flight of the operators. A cabin stove still warm and recent tracks in the mud were found by the searchers. No arrests were made.

School Boys on the Land

Schoolboys of Great Britain Did
Excellent Service

Last year the schoolboys of Great Britain did excellent service on the land, especially in connection with the harvest, and this year it is hoped that they will even more largely contribute to the labor resources of the nation. Urgent appeals are being made to the farmer to grow more potatoes, and the ministry of food has stated that they will even more largely contribute to the labor resources of the farmer. In this connection the Scotch education department realize the enormous help they could give, without much dislocation of school arrangements, by setting free a certain number of children in the public and other schools in Scotland at the time when they were most wanted for harvest.

The Foe of Indigestion.—Indigestion is a common ailment and few are free from it. It is a most distressing complaint and often the suffering attending it is most severe. The very best remedy is Parment's Vegetable Pills taken according to directions. They rectify the irregular action of the stomach and restore healthy action. For many years they have been a standard remedy for dyspepsia and indigestion and are highly esteemed for their qualities.

Germany's Labor Army

German Military Authorities Lay
Stress on Value of Their
Prisoners

"Our growing labor army," is the description applied by the Huns to their prisoners of war. According to a communique in the latest Berlin papers, Germany and her vassals between them now hold 3,575,000 prisoners. For the first time the German military authorities lay stress on the supreme value of their prisoners as man-power for industry and agriculture. They are so numerous, it is asserted, that they go far toward compensating Germany for the men she has had to withdraw from peaceful pursuits for active military service. "The longer the war lasts," the communique adds, "the more adaptable these prisoners become to the work assigned them, and the more useful to us."

Huns have a majestic awe of big figures. Thus it is explained for their edification that the "labor army" in prisoner camps is numerically greater than the whole male working-class population of Denmark, Norway, and Sweden combined, and is equivalent to one-fifth the total number of working men in Germany before the war.

Minard's Liniment Cures Distemper.

The Bottom Rung of Ladder

German Brutality Beyond All Characterization

The German bombing of the British hospitals in France is an act in regard to which ordinary language fails. The sweeping of the beds of the wounded with machine gun fire, and the ruthless killing of the devoted nurses and attendants who remained at their duty, is an abomination which seems to remove the German from the pale of humanity. Amid its horrors the one redeeming feature is the heroism of the women who refused to desert their posts and met death and wounds along with the helpless men who lay on their beds. The rest is brutality beyond all characterization. Throughout the war the airmen have been insistent in putting chivalrous conduct to one another, and have paid honors to their fellows, even of German race, who have fallen. An incident such as that which is recorded this morning may well shake a faith which has survived many shocks. It would be repugnant to all feelings to give horrors of war to the men who have deliberately taken part in an outrage of so gross and callous a kind.—Westminster Gazette.

Indian soldiers in France last year had 14,278 bottles of hair oil from the Indian Soldiers' fund.

NERVOUS PROSTRATION

May be Overcome by Lydia
E. Pinkham's Vegetable
Compound—This
Letter Proves It.

West Philadelphia, Pa.—"During the thirty years I have been married, I have been in bad health and had several attacks of nervous prostration until it seemed as if the organs in my whole body were worn out. I was finally persuaded to try Lydia E. Pinkham's Vegetable Compound and it made a well woman of me. I can now do all my housework and advise all ailing women to try Lydia E. Pinkham's Vegetable Compound and I will guarantee they will derive great benefit from it."—Mrs. FRANK FITZGERALD, 25 N. 41st Street, West Philadelphia, Pa.

There are thousands of women everywhere in Mrs. Fitzgerald's condition, suffering from nervousness, backache, headaches, and other symptoms of a functional derangement. It was a grateful spirit for health restored which led her to write this letter so that other women may benefit from her experience and find health as she has done.
"For suggestions in regard to your condition write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their 40 years experience is at your service."

Work Among Indian Children

Average Indian Child Possesses Considerable Natural Ability

A recent visit made to the Indian reserve at Swan Lake, Manitoba, was rewarded with a glimpse of the development which has taken place at this Pembina Valley domain of the aborigine. The school work is conducted upon lines similar to those in use among the white face neighbors in this prairie province. The attendance shows a daily average of twenty pupils, a number lessened at certain seasons of the year when the wanderlust of Indian life overtakes the parents, the offspring of whom are invariably taken for the "jaunt."

The teacher, Miss Jessie Bruce, has occupied that position several years, and additional to duties at the schoolhouse, her services are in constant demand for the mission work so ably superintended by her sister, Miss Tena Bruce.

A majority of the children, when admitted into the school, possess no knowledge of the English language, as native dialect is in constant usage within the home. Occasionally a new pupil is cognizant of the meanings of simple English words, which have presumably been used by some member of the family, by whom a few years at the Indian school at Portage la Prairie or Elkhorn may have been spent. But Indian children quickly learn the English tongue, and soon comprehend the duties expected of them at the school house.

An average young Indian is a child of ability, yet with certain studies of which arithmetic may be cited as example, a little difficulty is experienced. The art of penmanship is apparently a natural gift to the pupils; in crayon work, the juvenile Indian is an artist of no mean skill. The girls are of an unusually quiet disposition; when spoken to they appear adverse to any conversation. It is customary to devote one hour of each morning to study of the Bible, a feature of utmost importance to the Indian. The children are given drill exercises weekly, and attend the Mission House to receive instruction in various matters of domestic character.

The work accomplished by Miss Bruce requires no blare of trumpets. That task is heralding its own story in the character of young lives now being moulded into manners and customs of the palefaces. And what is more, the children not only respect their teacher, but love her for that, which she is accomplishing for them.—J. D. Athelney Evans in King's Own.

Reach High Mark

Western Canada School Lands Sell
for \$77.50 an Acre

High prices continue to mark the sales of school lands that are taking place in Western Canada. At Delisle, Saskatchewan, one parcel sold for \$77.50 an acre. Forty-four other parcels out of 93 sold, brought more than \$30 an acre each.

At a sale held at Strassburg, Saskatchewan, 122 parcels were disposed of, 85 of them at prices ranging from \$20 to \$64 an acre. At Lumsden, Saskatchewan, and Foremost, Alberta, sales have also been held and parcels were sold at prices up to \$50 per acre.

These are high prices for raw land in Western Canada. Most of the parcels were, however, purchased by residents of the respective districts, and knowing the producing power of the land, they consider they have good value. As a result of these sales, considerable uncultivated land will be prepared for next year's crop.

Lachute, Que., 25th, Sept., 1908. Minard's Liniment Co., Limited.

Gentlemen,—Ever since coming home from the Boer war I have been bothered with running fever sores on my legs. I tried many salves and liniments; also doctored continuously for the blood, but got no permanent relief, till last winter when my mother got me to try MINARD'S LINIMENT. The effect of which was almost magical. Two bottles completely cured me and I have worked every working day since.

Yours gratefully,
JOHN WALSH.

Flying Policemen

All Air Vessels Will Have to Be
Registered

Speaking in London recently, Rear-Admiral Mark Kerr, a member of the air council, said: "At the present time, if a commercial traveler leaves Paris to go to Timbuctoo, the journey occupies four months, but one of the first routes the French are going to establish after the war is to Timbuctoo, when the journey will then only take four days. As a commercial undertaking that will result in a great saving. Four months' food alone would be a considerable item."

"All air vessels will have to be registered, and no doubt a Lloyd's list will grow up. There will be a class A1 and so forth for vessels taking passengers and mails in the air. These would carry a flag, and those which did not would be pirates. The police could not put up their hands to stop people in the air, and the only way would be to knock them down."

"The formation of the air force," said Admiral Kerr, "is a distinct advance in aeronautics. It means the establishment of a general staff and the dealing with all problems connected with the air."

Production Is Essential

"Production is absolutely essential and the most demanding duty of the government is to see that it is carried on, but if we waited for further exemption and our men were decimated and destroyed, what kind of an answer would it be to say we had increased production?"—Sir Robert Borden.

BEECHAM'S PILLS

When your head aches, it is usually caused by your liver or stomach getting out of order. These "sick headaches" quickly disappear as soon as the stomach is relieved of its bilious contents. Right your stomach and regulate and tone the liver with Beecham's Pills, which rapidly improve conditions and promptly

Sold everywhere in Canada and U.S. America. In boxes, 25 cents.

Greek Territory

Promised Bulgars

Germany Tries to Soften Allies Over
Roumanian Treaty

A despatch to The Journal des Debats from Geneva says Germany has guaranteed to Bulgaria, not only Drama, Seres and Kavala, but all the territory gained by Greece in 1913 by the treaty of Bucharest, in order to satisfy the growing dissatisfaction in Bulgaria over the treaty concluded with Roumania.

Anger at Greece, the correspondent adds, is increasing. Greece is now called Bulgaria's principal enemy by the Bulgarian press.

A conference of the central powers will be held in Sofia in September under the chairmanship of King Ferdinand, at which the Ukraine, also, will be represented, to discuss the economic development of the Balkans, the correspondent asserts.

Avoid Harsh Pills!

Doctors Condemn Them

Most Pills unfortunately are harsh and drastic; they cause inflammation and great discomfort. Rather like nature is the way a pill should act, mildly but effectively. Science has established nothing more satisfactory as a family pill than the old reliable pills of Dr. Hamilton's which for forty years have had a premier place in America. Dr. Hamilton's Pills are very mild and can be effectively used by the aged, by children, and indeed by men and women of all ages. No stomach or bowel medicine is more reliable. No remedy for indigestion, headache or biliousness is so effective, so mild, so certain to quickly cure as a 25c box of Dr. Hamilton's Pills.

Improving the Stock

Alberta Farmers are Strong for
Purebreds

That the breeding of purebred stock is getting a secure hold in the farming operations of Alberta farmers in all parts of the province is once more demonstrated by the purchase recently by the Rigby Farm, Paradise Valley, near Lloydminster, Alberta, of "Hillcrest Favorite," the grand champion Clydesdale stallion at the Brandon Winter Fair.

In the Rigby stud there are 60 horses, 30 of the mares being purebred Clydesdales, mostly imported. These are a group of quality mares that can hold their own in the best of company, and "Hillcrest Favorite" should cross well with them and produce Clydes of high class.

There are 200 head of cattle also on the farm, mostly Shorthorn grades, but including 20 purebreds and the owners have decided to gradually work into the purebreds as they come to the conclusion they are the only kind worth raising, taking just the same amount of feed as a grade and yet bringing a much higher price when marketed.

New Pig Iron Plant in B.C.

Pig iron is now being cast from an electrically operated furnace in British Columbia. The first runs were made a few days ago at Port Moody from the new plant installed by the Aetna Iron and Steel Company, and were a decided success, according to statements received, more than twelve tons of grey pig iron being manufactured.

Already contracts for 2,000 tons of pig iron have been obtained, a portion of this on orders for Japan.

War Relief Entertainments

Regular Supply of Entertainment for
Convalescent Soldiers in
Canada

War emergency entertainments have been given in England for the past three and a quarter years, during which no less than 900 concerts have been given at an expense of £7,000 in fees to the artists engaged. The objects for which the committee engaged in this work was formed are: to give free concerts to wounded soldiers in hospital, to provide employment for artists thrown out of employment by the war and to foster British music. Although artists are proverbially over-generous in donating their services for "relief entertainments," many find themselves stranded because of the war. Delicacy of touch in the case of instrumentalists is essential to their success and prohibits any occupation that would destroy this essential.

During the first year of the war many Belgian artists, refugees, found themselves without resources other than those furnished by means of these concerts. The scheme has finally widened its scope until on Thursdays at Steinway Hall there are regular "All-British" concerts in which no less than 251 new compositions have been produced. Besides there have been open air concerts as well as hospital concerts for wounded sailors and soldiers, concerts at camps and Y.M.C.A. Last summer by permission of Admiral Sir David and Lady Beatty the open air concerts took place during the summer and early autumn in the gardens of Hanover Lodge every Saturday afternoon. Soldiers and sailors in uniform are always admitted free and those in hospitals receive complimentary tickets. The Viscountess Helmsley has the movement in charge.

There has been a regular supply of entertainment for convalescent soldiers in Canada ever since their first appearance but nothing so systematic and far-reaching in its scope as the London concerts. Our society—the Women's Art Society of Montreal—has, however, confined its patriotic relief work to artists in uniform who found their livelihood threatened and alarmingly diminished by the war. In raising funds for this very considerable relief work the society has provided several delightful evening lectures by prominent persons—among others, Granville Barker.

The Oil for the Athlete.—In rubbing down, the athlete can find nothing finer than Dr. Thomas' Electric Oil. It renders the muscles supple and pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Typewrite the Signature

In these days of typewritten letters and equally typewritten official documents, the writing by hand is becoming a lost art.

Average of time for reading letters is two minutes for the body of the letter and anywhere from fifteen minutes to two hours trying to figure out who made the hieroglyphics that stand for a signature.—Toronto Telegram.

Minard's Liniment Cures Garget in Cows.

Advantages of Irrigation

In some parts of Western Canada there will be no crop this year on account of a long period of drought. It was because these sections of the country are subject to dry years that the Canadian Pacific Railway undertook the development of its large irrigation project in Southern Alberta, the greatest on the entire continent of America, which the Gleichen is the centre. The soil is the most fertile on the continent, and the climate is all that can be desired to raise large crops, but the supply of moisture is not always dependable. The volume of the crop is in direct ratio to the supply of moisture. Given sufficient moisture, large crops are grown everywhere, with a moderate supply of moisture only moderate crops are obtained, and with little or no moisture, little or no crops are harvested. Fortunately this last named condition occurs more rarely than the first named, so that in year in and year out farming in Southern Alberta brings returns as high as anywhere. With irrigation, however, the leaner years may be avoided altogether and the farmer may assure himself of large crops every year. This is noticeable this year when farmers on irrigated land have wheat which gives very promise of yielding 50 bushels to the acre while that on non-irrigated land in the same districts will probably not reach more than 10 or 15 bushels an acre.

Winter Rye Useful Crop

Quite a number of farmers in the Gleichen district are now going in to raise winter rye. A few have successfully experimented with it already and it promises to become a very popular crop with stock men and those who go in for mixed farming, as it provides good pasture in the fall and spring, yields upwards of 30 bushels to the acre and commands a good price. In this district it has been found now is the best time to sow winter rye and our farmers have been busy sowing it for the past week or more.

Western Canada. Week by Week says some remarkable samples were brought into Edmonton from a field about eighteen miles northeast of that city. They measured 6 feet 5 inches in length. This rye was sown about July 20th last year and was pastured heavily until the winter season. It was pastured again in the spring until about May 20th. The growth now shown was made since that date. The crop looks good for 20 bushels per acre and from present appearances it should be ripe about August 10th. Mr. McDonnell, from whose field

the sample was taken, has grown rye for pasture for six or seven years, but this is the first year he has allowed it to produce grain. He considers it the best friend of the north-west stockman, as it gives abundant pasture in fall and spring, when both winter feed and grass pastures are scarce. When growing rye as pasture only it has been sowed about July 15. This gave good pasturage from September 1st until winter, and in the spring the pasture was as good as soon as the condition of the ground permitted the cattle to be turned out. He then pastured until July 1st. He plowed the land and let it lie for a couple of weeks to let the weeds start. Then he cultivated to destroy the weeds and sowed rye again. The value of fall rye in cleaning land from weeds is only about to be realized for pasture.

The Gleichen Red Cross Society desires to acknowledge with thanks the receipt of \$14.25 from the Pioneer Women's Institute, which was realized from the ice cream stand at the farmers picnic on July 12th, conducted by the ladies.

At least fifty per cent of the chickens, young ducks and turkeys, and ten per cent of the adult birds, die each year from influenza, many of which are preventable. This is an annual loss of probably millions of dollars that should be avoided to a large extent. When trouble occurs forward to the Biological Laboratory, Central Experimental Farm, Ottawa, Ont., a sick fowl, or, in the absence of such, a dead bird. In the interval disinfect the quarters, run, drinking fountain and feed dishes to check the spread of any infectious disease.

PEOPLES BAKERY

Under New
OWNERSHIP

Having purchased the Peoples Bakery from Larkia & Gibson I desire to announce to the public that it is my intention to supply my customers with the very best in bread, cakes, fresh fruit and confectionery of all kinds.

Victory Bread

In compliance with the Food Controller's regulations only can be obtained at this store, but customers will find our blend much better than they may expect as we must now use 30 per cent of cereals with every 75 pounds of flour.

I am using a blend of cereals which experience has taught me makes a very nice sweet loaf.

BUY 'AN IRRIGATED FARM BECAUSE:

Irrigation makes the farmer independent of rainfall, and in sure good crops, not occasionally, but every year.

Irrigation makes possible the successful culture of alfalfa, the king of fodders, which insures good returns in dairying and mixed farming.

Irrigation means intensive farming and close settlement with all the advantages of a densely populated agricultural community.

Irrigation in the Canadian Pacific Railway irrigation block is no longer an experiment, the years that it has been tried having absolutely demonstrated its success wherever in intelligently applied.

This is the most liberal offer of irrigated farm land on record. For full particulars apply to

ALLAN CAMERON, Gen. Supt. of Lands
Canadian Pacific Railway, Dept. of Natural Resources, 923 1st St. E.
CALGARY, ALBERTA

You can buy irrigated land from the Canadian Pacific Railway at prices up to \$50

per acre, with 20 years to pay and the privilege of a loan of \$2,000 for improvements

(6% interest) no principle after first payment until end of fourth year, reduced interest if settlement conditions are complied

and no water rental for first year. Contract can be paid off before maturity if desired.

Make Use of Roughage

By W. F. STEVENS
Alberta Live Stock CommissionerThe recent rains will start a new
growth on many fields which gave
little, if any, signs of producing
even forage. One or two additional
rains will produce a crop worth
cutting.If this crop is left to stand until
winter in the hope of utilizing it as
winter pasturage it will prove a dis-
appointment, because it will still
be so tender and succulent that it
will possess less than half its feed-
ing value after the frost strikes it.
It would be much better to cut it as
green feed, even though scarcely
mowed out, but it would be even
better to mow it as hay and take it
up immediately and stack it along
with alternate loads of last year's
straw. Handled in this way it will
retain much more of its nutriment
than it will if left to lie in the sun
to dry, and the straw will be ren-
dered more palatable and digestible
because of its contact with this suc-
culent feed. Both will be further
improved if from three to five
pounds of common salt are applied
to each load of green hay.The hay supply in the north
country is enormous. The demand
in the south is likewise enormous,
and in order to make sure the
available supply of hay that is
within hauling distance of a railway
station shall be sufficient to meet
requirements, the best possible use
must be made of what feed exists in
the south country. Meadows both
in the north and south that were
formerly looked upon as too small
to bother with must be made use
of. What remains of last year's
straw crop must be requisitioned,
and if mixed with this year's Aug-
ust growth, as suggested above it
will materially aid in relieving the
situation.D. Bienvenu, of Ouelletteville,
offers the sum of \$25.00 to any
person anywhere who will leave a
bushel of wheat grown this year at
The Call office that weighs more
than a bushel that he will bring to
this office. This offer is to stand
good to December 1st, 1919, and The
Call proprietor is to be the judge.
The \$25 is to be given to the Red
Cross by the winner. This offer
has been signed by Mr. Bienvenu
and is in The Call's possession.Here is an excellent opportunity
for "Marquis" Wheeler and all
other wheat kings to become fam-
ous.

AN ANNOUNCEMENT OF

Vital Importance to all users of
Automobile TiresYou as an owner of an automobile are undoubtedly inter-
ested in the reduction of your upkeep expense—especially as it
concerns tires. Consequently I am pleased to announce that I
am installing a most complete and modern vulcanizing equip-
ment and will be prepared to take care of all kinds of work on
all sizes of tires.If you live in town call at my shop, or if it is not conven-
ient for you to call personally send your casing to me for in-
spection. If I find the tire is worth repairing I will save you
money. The work will be unconditionally guaranteed to out-
last the remainder of the casing.I will pay transportation charges one way and a trial will
convince you.

A competent man will be in charge of machine.

Mr. and Mrs. Thos. Henderson are spending a few weeks at Banff.

Mr. and Mrs. J. B. Leggett are happy in the arrival of a fine boy at Drumheller.

Mrs. Roy M. Allen returned last week from a short stay at Banff with her children.

Mrs. F. W. Keniston has arrived from Tacoma, Wash., to visit Mrs. F. L. Mallory.

Mrs. R. W. Brown has been seriously ill for the past week, but a speedy recovery is hoped for.

J. M. Telford arrived last week from New Westminster, B.C., to look after his farm interests here and expects to return in a few days. He says he has a fine crop of berries and other fruit this year.

Craiganter Items

Harvest started on August 1st in the Craiganter district, when J. K. Craigo cut two good fields of oats.

On July 28th the members of the Morcan church met at the house of M. C. Han-son and heard some excellent addresses by the leading clergymen of Gleichen and other districts. The intention is to have meetings more regular.

H. H. Shaw was in the district last week from Calgary. It is some time since we last saw Mr. Shaw around here and everybody was glad to see him looking so well.

H. B. Grant is expected back from Montana and to bring his family along with him to make their home here. We wish them good luck.

The Craiganter Kaiser is on the war path again. What about a cage for him?

Upwards of 2,000 acres have been irrigated in this district this season and as a result we have some fine looking crops.

Local and District News

Mr. and Mrs. Kidney returned last week from visiting a couple of weeks at Victoria, B.C.

We regret to learn that Mr. J. W. Jewett has been laid up for more than a week and has now developed typhoid fever.

Roy Carson is the happiest man between here Missleigh and all over the arrival of a fine baby girl at Calgary on Monday, July 29th.

A nice shower of rain favored Gleichen on Monday but did not last long enough to do much good. If it happens again our sporting editor promises to catch a few drops for exhibition purposes.

At 2 o'clock tomorrow afternoon--Friday--the sale of unclaimed horses will be held at the dipping vat on the Indian reserve, two miles south of Gleichen, by the Alberta Government.

R. M. Mace was in town last week and stated he expected to start harvesting in a few days. Asked what he had to cut he said: Five thousand bushels of wheat on a half section. We say a crop every year because we farm right. You may tell every farmer that.

Messrs. Brier & Barron entertain large number of their friends at a barn dance last Friday night, all of whom thoroughly enjoyed themselves. The music was excellent being supplied by a five piece orchestra from Calgary, and a supper was supplied of all the good things one could possibly desire. The dance was held in the fine barn where these enterprising young farmers have just completed on their farm located about ten miles northeast of town.
